About the Program:

The changes and improvements throughout the City of Hope campus and its neighboring communities will support its effort to expand its research and patient care capabilities. The growth is focused on how best to accommodate the needs of patients and their families, faculty and staff that will enable City of Hope to meet its commitment to transform the future of medicine. Join us to hear from the individuals managing the specific plan. The team will speak to Phase 2 and how they plan on continuing the enhancement and repurposing of existing facilities and the development of new opportunities to expand and provide flexibility for the future buildout of the campus.
