About the Program:

A glimpse into the future: Southern California's needs and opportunities in water, transportation, housing, stormwater, airports, and urban centers. This panel will share upcoming approaches such as Public-Private Partnerships (P3s), performance-based contracting, and other streamlined alternative delivery methods for sustainable infrastructure. This discussion will be of particular interest to leaders in the AEC community (including planners, architects, landscape architects, engineers and consultants, contractors, and construction managers), small businesses, and impact investors, to network and plan for the future.

Date/Location:

Thursday, March 19, 2020 @ 11:30am
Doubletree Hotel
120 S. Los Angeles Street
Los Angeles, Ca 90015
