About the Program:

Women undoubtedly will continue to face challenges in a male-dominated industry. Fortunately, the industry is increasingly accepting women and women have risen up to meet these challenges. Hear from these women in leadership roles that are changing the landscape and paving the way for generations to come. This panel is developed by AAa/e to support, promote and inspire women who have chosen careers in the A/E/C industry. We believe that empowering women today leads to more empowered women for tomorrow and by creating educational and thoughtful discussions it encourages women to thrive in their careers. We welcome and invite our male colleagues to join us.
