### **About the Program:**

In the recent past, we faced megadroughts followed by atmospheric rivers, reductions in water supply, new contaminants, and a goal for 100% reuse... and now we are faced with an unprecedented pandemic. Listen to a panel of water industry thought leaders as they share their thoughts, ideas, and strategies as they prepare for an unknown future. This promises to be an interesting and thought-provoking discussion, which you will not want to miss.
