FOUNDER**

**RAYMOND TAN  
E.I.T., ENV SP  
(MODERATOR)  
DRP ENGINEERING, INC.  
ASSOCIATE ENGINEER**

Mr. Poh, President of DRP, specializes in environmental and civil engineering. He is experienced in water, stormwater, and wastewater conveyance and treatment facilities. As a key member of project teams, he has over 20 years of engineering experiences and has been responsible for directing work and coordinating closely with clients, subcontractors, contractors, and staff in multiple offices. Prior to joining DRP, Mr. Poh worked for several Fortune 500 engineering firms and was the project manager to a number of large-scale projects.

Over two decades of robust global experience, Ms. Kumamoto masterfully navigates the retail and commercial project landscape, from Santa Monica's beachfront to Dubai's dazzling skyline. Today, she stands at the helm of her own firm, CigoL Architecture, as the Studio Principal. Her hallmark? Crystal clear, judgment-free communication, coupled with a firm belief in the power of teamwork.

Ms. Luoya Tu came to U.S. with her architecture dream to pursue her post professional degree at UCLA in 2007. With years of global experiences in design and management, she founded Archimorphic in Los Angeles in 2015. This award-winning architecture design firm has created successful projects as a seamless synthesis of both artistic expression and problem solving. In the midst of the Pandemic, she embarked on a new endeavor Epilocus, an architect-led development firm, to continue the exploration to her journey of architecture. She is also the Design Review Commissioner for the city of San Gabriel.

Presenting Raymond Tan, the associate engineer of DRP, who focuses on water, stormwater, and wastewater conveyance. With an impressive five years of practical experience under his belt, Raymond embodies youthful vigor and an insatiable curiosity for origin stories.

## ENTREPRENEURSHIP: STORIES OF STARTING FROM SCRATCH

08 . 03 . 23

**NAC ARCHITECTURE**

837 NORTH SPRING STREET THIRD FLOOR  
LOS ANGELES, CA 90012
